

## Summer Training: ML and Agentic AI

### Project #1 Grade system workflow using Agentic AI

#### Problem Statement

During the 25-day **Machine Learning and Agentic AI Training Program**, students participate in a daily MCQ quiz conducted through Google Forms. After each quiz, the marks of all students are downloaded and stored as separate files. As the number of quizzes increases, manually combining marks, calculating cumulative scores, computing module-wise and overall percentiles, assigning grades, generating grade cards, and sending performance reports to students becomes a time-consuming and error-prone process.

Therefore, there is a need to develop an **Automated Training Performance Management System** that can automatically detect newly added quiz files, combine student scores using their email IDs, calculate daily, module-wise, and overall performance, determine percentiles and grades, generate personalized grade cards, and email them to students without manual intervention.

The system should be simple, reliable, scalable, and completely based on free and open-source technologies so that it can be used efficiently for training programs involving a large number of participants.

#### Working of the System

- 1: Conduct Daily Quiz
- 2: Store Quiz File
- 3: Automatic File Detection
- 4: Merge Student Records
- 5: Calculate Performance

#### The system automatically calculates:

Daily Performance

Percentage score for each quiz.

Module-wise Performance

Marks and percentage for each module.

# LLOYD INSTITUTE OF ENGINEERING & TECHNOLOGY

*(Affiliated to Dr. A.P.J. Abdul Kalam Technical University & Approved by AICTE, New Delhi)*

Cumulative Performance

Performance considering all quizzes conducted so far.

Module-wise Percentile

Relative standing among all students.

Final Percentile

Overall percentile considering all modules.

Rank

Overall rank of each student.

Grade

6: Generate Grade Card

7: Email Grade Card

## **Outputs Produced by the System**

1. Master Performance File
2. Module Summary File
3. Final Rankings File
4. Individual Grade Cards
5. Email Reports

## **6. Dashboard (Optional)**

Top Performers

Module-wise Performance

Grade Distribution

Weak Students

Average Marks

Overall Statistics

**Students Task :**

# **LLOYD INSTITUTE OF ENGINEERING & TECHNOLOGY**

*(Affiliated to Dr. A.P.J. Abdul Kalam Technical University & Approved by AICTE, New Delhi)*

1. Understand the problem
2. Visualize the problem
3. Evaluate different ways to implement
4. Choose best suitable to your choice and ability( Preference to Agentic AI)
5. List all tools and techniques
6. Implement and Test and deploy
7. Final Report and Presentation
8. Use Any GPT Model(Chat GPT etc) give reference and Prompt used in your Report and presentation
